(2) LEARNING OUTCOMES

<p>Learning outcomes <i>The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.</i></p> <p><i>Consult Appendix A</i></p> <ul style="list-style-type: none"> • <i>Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area</i> • <i>Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B</i> • <i>Guidelines for writing Learning Outcomes</i>
<p>To build a successful business today, you also must be equipped to turn disruptive innovation into competitive advantage. Focusing on the challenges facing business leaders (either in start-ups or within large corporates), this course helps students develop the critical skills to identify new business opportunities and transform them into profitable companies.</p> <p>The course examines broad processes of innovation (the creation of markets, the flow of ideas, the dynamics of innovation and commercialization) and also related organizational processes (strategy, structure and internal processes that foster creativity) that are relevant to all organizations seeking to develop an entrepreneurial mindset. Students gain an appreciation of the competitive, institutional, political and economic drivers of innovation, and gain practical insights into analyzing business model viability, assessing opportunities, creating new ventures and designing effective organizations for innovation.</p>

<p>General Competences</p> <p><i>Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?</i></p> <p><i>Search for, analysis and synthesis of data and information, with the use of the necessary technology</i> <i>Adapting to new situations</i> <i>Decision-making</i> <i>Working independently</i> <i>Team work</i> <i>Working in an international environment</i> <i>Working in an interdisciplinary environment</i> <i>Production of new research ideas</i></p>		<p><i>Project planning and management</i> <i>Respect for difference and multiculturalism</i> <i>Respect for the natural environment</i> <i>Showing social, professional and ethical responsibility and sensitivity to gender issues</i> <i>Criticism and self-criticism</i> <i>Production of free, creative and inductive thinking</i> <i>Others...</i> </p>
<p>Decision-making Working in an interdisciplinary environment Adapting to new situations Production of free, creative and inductive thinking Working independently Team work Criticism and self-criticism</p>		

(3) SYLLABUS

<p>The course explores the entrepreneurial process and focuses on the following topics:</p> <ul style="list-style-type: none"> • Identifying and analyzing entrepreneurial opportunities • Turning a viable opportunity into a focused strategy and well-defined business initiative • Creating "pitches" to sell the idea to investors, customers, partners, and key employees • Building the organization and capabilities needed to launch and nurture early-stage ventures • Deciding whether to build capabilities in-house or obtain them through partnerships, joint ventures, or potential acquisitions • Evolving the strategy, organization, and leadership model as the business grows • Recognizing and managing risk, while creating and measuring value.
